

the German army on the part of our artillery units. The German army units of the enemy took place yesterday.

"From the Oise to the Argonne the situation in the vicinity of Soissons shows no change. Near Berry-au-Bac a trench which we were compelled to evacuate following a violent bombardment was recaptured by us. In the region of Perthes the enemy delivered an attack during the night of Jan. 20-21 at a point northwest of Beaumont, but without success.

"Between the Meuse and the Moselle: To the southeast of St. Mihiel, in the Forest of Apremont, an exceedingly violent bombardment made it impossible for us to retain the German trenches occupied by us yesterday for a distance of 150 yards.

"To the northwest of Pont-a-Mousson, in the Forest of La Froite, the enemy yesterday recaptured a portion of the trenches taken by us Jan. 20, but we are maintaining ourselves at all other points of this position.

"In the Vosges the enemy buried against St. Die six projectiles of great calibre without doing any serious damage.

"At a point between Mount Bonhomme and Mount Sehlucht there has been an artillery engagement in which the German batteries were reduced to silence.

"In Alsace the infantry fighting in the region of Hartmann and Wellerkopf is going on with great ferocity. The struggle is actually hand-to-hand.

"In front of Dannemarie our artillery dispersed gatherings of the enemy."

BRITISH STEAMER SUNK BY TORPEDO OF A SUBMARINE

Believed to Be the First Ship in Carrying Out Plan of Von Tirpitz.

AMSTERDAM, Jan. 22.—Germany has begun the retaliatory naval warfare against British merchantmen suggested by Grand Admiral von Tirpitz in an interview which he gave late in December. This was the interpretation placed on the sinking yesterday of the British steamer Durward by the German submarine U-19 off the coast of the Maas.

"This is evidently the beginning of the new phase of naval warfare advocated by von Tirpitz in his interview with the American correspondent," observes the Telegraph.

The Telegraph recalls that in his interview the German naval commander, in commenting upon England's attempt to starve out Germany, asked what America would think if German submarines would embark on a campaign of destruction against British merchantmen with the purpose of cutting off supplies to England.

Members of the crew of the Durward say German officers on board the ship covered the captain and crew with revolvers. They ordered all on board to take to small boats. The submarine towed the boats away to a safe distance. The submarine returned to the Durward and sank her.

The submarine then picked up the small boats and towed them for six hours until they reached the Maas Lightship. Then the Germans cast them adrift and went away at full speed.

GOVERNOR MAY NAME ALL.

Assembly Bill Increases Power on

State Court Appointments.

ALBANY, N. Y., Jan. 22.—Assembly

Bill might empower the Governor

with the appointments of all the

members of the proposed Court of

Appeals, both regular and "addi-

tional." His original bill gave the

power to select the first to Whitman

and the latter to the Appellate

Division. His amendment proposed to-day

in the Assembly would remove this

prospective function from the Appellate

Division. It further provides

for two "additional" members instead

of three judges. Their terms would

expire by Jan. 1, 1917. They must be

members of ten years' practice in the

state. Their particular duty would

be the hearing and deciding of "dam-

age claims" against the State.

SALTS IF KIDNEYS

OR BLADDER BOTHER

Harmless to flush Kidneys

and neutralize irritating

acids.

Kidney and bladder weakness result

from urine acid, says a noted authority.

The kidneys filter this acid from the

blood and pass it on to the bladder, where

it is stored, awaiting excretion, or

passing on to the bladder, where

it is stored, awaiting excretion, or

passing on to the bladder, where

it is stored, awaiting excretion, or

passing on to the bladder, where

it is stored, awaiting excretion, or

passing on to the bladder, where

it is stored, awaiting excretion, or

RUSSIAN TROOPS ATTACK GERMANS ON 40-MILE FRONT

Right Wing Is Reported Only Ten Miles From Prussian Border.

MOVE AGAINST THORN.

German Commander Attempting an Attack Upon the Rear of Russians.

PETROGRAD, Jan. 22 (United Press).—Along a forty-mile battle front, extending at one point to within ten miles of the German border, Russian troops are being hurled against the Germans to-day in the bloodiest engagement since the new Russian offensive against East Prussia developed.

Fighting along the Mula River is desperate, with both sides suffering heavily. The Russian infantry captured Skempe yesterday and is pressing westward along the Mula, with the Prussian city of Thorn as its objective, but is meeting with stubborn resistance.

The Russian left is about thirty-five miles from Thorn, but the right, resting near Rypin, is scarcely ten miles from the Prussian border.

In an effort to halt the Russian offensive Gen. Francotte is attempting a movement against the Russian rear from the Mula region. Heavy reinforcements are pouring to his aid.

(Special to The Evening World.)

NEWARK, Jan. 22.—A hundred

nurses at the City Hospital left

their patients to-day and walked

across the street to the Nurses' Home

and told Miss Mary P. Mason, Home

superintendent of the Nurses' Training

School, that unless three nurses sus-

pended at her last night are reinstated

by tonight they would all strike.

Trouble has been brewing at the

local hospital for several weeks, and

when Miss Mason suspended three

nurses the fight became so warm

that the graduate nurses and mem-

bers of the training school decided to

stand by the suspended nurses.

The hospital at the present time is

overcrowded. As there is no Board

of Health at present the situation is

serious.

Miss Mason last night made a tour

of inspection. In ward seven she came

upon Miss Elizabeth Allen, Edith

Borcher and Anna Kelsner, three

nurses assigned to that ward, having

a lunch of toast and coffee. They were

suspended at once for an indefinite

period and went to their homes.

No more was heard about the mat-

ter until to-day, when all the nurses
